Restriction is required under 35USC 121 and 372.

This application contains the following inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

Group I, claims 1,4, and 6-15, drawn to a package for packaging coffee or tea particulate.

Group II, claims 16 and 18, drawn to a method of packaging tea or coffee particulate.

The technical feature linking the two inventions is a container capable of being pressurized, with the container containing a filter pouch containing coffee particulate, a CO₂ atmosphere under pressure and a covering portion for the container, which combination does not provide a contribution over the prior art, as evidenced by Heyman (2,022,467, e.g., col. 3,para. 2). Therefore, the technical feature is not a special technical feature and the claims are restrictable under 371 practice.

In accordance with 37CFR 1.499, applicant is required, in response to this Office action, to elect a single invention to which the claims must be restricted.
